Hydraulic Intensifier.

- Quick connect into any hydraulic machinery and will operate any 3,000 to 10,000psi equipment.
- Available in single or double acting configuration.
- The unit can be installed to electro hydraulic bolting machines and miners and is operating quicker and safer
- Without the need for as much servicing as an air operated unit.
- It now comes with an adjustable pressure and flow valves so it can be fitted to your machine with out any costly modifications.
- Load sensor port standard equipment.
